

## **Student A– Client Interview**

You're a programmer and you will meet a client for the first time. Use these prompts to ask him / her questions about the new project. The idea is that you interview the client and engage in a "natural" conversation to start working for him / her.

### Useful prompts

-Type / company / project?

-Users?

-What / problems / need to solve?

-Deadlines?

-Budget?

-Previous software?
